## **InterSharing**

We are a group of students studying at the ESCE, International Business School of Paris.

Our vision is making Paris a better place for those in need and our mission is to focus on humanitarian and social efforts in Paris through volunteer work.

Our goal is to provide basic essential products and hopefully by then, helping them to overcome some of the challenges living on the street can give.

## **Our objectives**

We would like to work in collaboration with supermarkets that could make us some donations. Thus we will organize a distribution to homeless people in the streets of Paris with all the hygienic products that we will collect. We would like to make the life of homeless people as better as we can, through our volunteer work!

**THANKS YOU ALL!!**
